3. Pending claims are objected because claimed “means” in means-plus-function format claims are unclear in the specification, and 3 informal drawings, the examiner hereby requests the applicant to point out a clear definition of these claimed means-plus-function (for instance, means on-board the aircraft for obtaining a continuous determination of the aircraft's attitude; data processing means on-board the aircraft for processing said altitude, attitude and roll rate determinations; and means on-board the aircraft responsive to said data processing means for providing corrective voice messages to the pilot.
4. The examiner also submits that there is a restriction on patentably distinct species, as shown below:

Restrictions

5. This application contains claims directed to the following patentably distinct species of the claimed invention (due to divergence of claimed subject matters):

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case.
